PLANHEAT PARTNER PRESENTATION

Bruxelles, 17 – 18 October 2016 – 1st General Assembly – Kick Off Meeting

PARTNER PROFILE

- **Short name:** GVG
- **Country:** Republic of Croatia
- **Organization type:** Local administration
- **Core business area:** Government / administration / local policies
- **Relevant competencies / experience:** City of Velika Gorica has conducted, during the last few years, various projects connected to the energy efficiency and renewable energy resources, funded from the Environmental Protection and Energy Efficiency Fund of the Republic of Croatia. The city has also taken a partner role for some EU funded projects in the same field, that are currently being carried out (IEE STRATEGO and BEAST) or submitted to calls during 2016 (LIFE, H2020).

ROLES AS CONSORTIUM PARTNER

- **Main exploitation intention:** City of Velika Gorica needs some useful tools for planning its future low-carbon development in terms of energy efficiency, energy demand and supply, incorporation of renewable energy resources in energy production and distribution networks, diversification of resources and supply lines to secure the energy supply as needed.
- **Role in the project:** The City of Velika Gorica will, in close cooperation with Faculty of Mechanical Engineering and Naval Architecture of the University of Zagreb (UNIZAG FSB), devise, test and validate real-case scenarios for heating and cooling plans, as well as energy mapping, with different modules integrated in the proposed PLANHEAT tool, which shall be developed during the project implementation. One environmental protection and energy efficiency expert, employed in the GVG, shall coordinate the definition of main priorities and specific targets for the GVG, according to the existing, as well as revised Sustainable Energy Action Plan for the City of Velika Gorica (SEAP / SECAP), devised under the accepted obligations of the Covenant of Mayors (2011).
